2. As you are well aware, the official transcripts of the WS 117-L Special Studies Committee Meetings are usually released more than a month after each meeting. Under the presumption that you might have a particular timely interest in the last meeting, I am taking the liberty of sending this Memorandum for the Record which, lacking in prose, is almost cryptic. However, I know that you are completely familiar with the program and would therefore trust that the numbers, names and dates will have some usefulness to you.

3. If there be need for some expansions or clarifications, I will be happy to have [redacted] provide what they can from their memory of the discussions which are often disjointed.
